RUK STRATEGIC GROWTH ETF (RKSG) — SUMMARY SECTION

Investment Objective

The Ruk Strategic Growth ETF (the “Fund”) seeks to track total return performance, before fees and expenses, of the Ruk Strategic Growth Index (the “Index”).

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and the Example below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.50%
Distribution and/or Service (12b-1) Fees	None
Other Expenses ⁽¹⁾	0.00%
Total Annual Fund Operating Expenses	0.50%

⁽¹⁾ Based on estimated amounts for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not include the brokerage commissions that investors may pay on their purchases and sales of Fund shares. Although your actual costs may be higher or lower, based on these assumptions your cost would be:

1 Year	3 Years
\$51	\$160

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected above in annual fund operating expenses or in the expense example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategy

The Fund is an exchange-traded fund (“ETF”) that employs a “passive management” (or indexing) investment approach designed to track the total return performance, before fees and expenses of the Ruk Strategic Growth Index (the “Index”). The Index is based on a proprietary methodology developed by Ruk Indexes LLC (the “Index Provider”) and is maintained and calculated by VettaFi (the “Index Agent”).

The Index

The Index seeks to generate returns that exceed the broader U.S. large-cap equity market over a full economic cycle. The Index’s eligible universe of securities is comprised of 1000 largest US based and listed companies by market capitalization as determined by the Index Agent. To be included in the investable universe a security must have its primary listing on a US exchange. The investable universe does not include American depositary receipts. As of December 31, 2025, the market capitalization range of securities in the Index’s eligible universe ranged from \$2.7 billion to \$4.4 trillion.

The Index analyzes the following growth and value factors listed below. The growth factors consist of: (1) issuer’s stock price momentum, (2) most recent twelve months sales compared to the three prior years sales, (3) a ratio based on the issuer’s market capitalization to net sales ratio (price-to-sales ratio), (4) a ratio based on the issuer’s market capitalization to net income (price-to-earnings ratio), (5) a ratio based on the issuer’s market capitalization to common equity (price-to-book ratio), (6) a ratio of net income to total revenue (net profit margin growth) and (7) an issuer’s percentage change in total assets over the recent twelve month period (total asset growth). These factors are combined for each issuer to compute an initial growth score.

The value factors consist of: (1) a ratio of operating cash flows for an issuer divided by the total assets of that company (cash flow-to-total assets) and (2) a ratio of an issuer's twelve month earnings before interest, taxes, depreciation and amortization to the sum of its total market capitalization, long term debt, and short term debt (EBITDA to EV). These factors are combined for each issuer to compute an initial value score.

The growth and value scores are then combined to assign each stock a composite rating. The rating is scaled in a manner to ensure that securities with a strong growth profile are rated more favorably. Index focus is on those securities that possess a strong growth profile and generally those holdings in the top half of the score are considered for inclusion in the Index. The final weightings are determined based on a proprietary model that seeks to limit volatility.

The Fund's Investment Strategy

The Fund generally uses a "replication" strategy to achieve its investment objective, meaning the Fund generally invests in all of the component securities of the Index in the same approximate proportions as the Index, but may, when the Fund's portfolio manager believes it is in the best interests of the Fund, use a "representative sampling" strategy, meaning it may invest in a sample of the securities in the Index whose risk, return, and other characteristics closely resemble the risk, return, and other characteristics of the Index as a whole (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

Under normal circumstances, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in the securities comprising the Index and in investments that have economic characteristics similar to the securities comprising the Index.

The Fund will concentrate its investments (i.e., hold more than 25% of its total assets) in a particular industry or group of industries to approximately the same extent that the Index is concentrated. Similarly, the Fund will focus its investments in a particular sector to approximately the same extent as the Index. As of December 31, 2025, approximately 37.9% of the Index was represented by companies in the information technology sector.

Principal Risks

The principal risks of investing in the Fund are summarized below. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus titled "Additional Information About the Fund."

Equity Securities Risk. The risks that could affect the value of the Fund's shares and the total return on your investment include the possibility that the equity securities held by the Fund will experience sudden, unpredictable drops in value or long periods of decline in value.

Market Risk. Financial market risks affect the value of individual instruments in which the Fund invests. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money. Factors such as economic growth and market conditions, interest rate levels, and political events affect the markets. Periods of market volatility may occur in response to market events and other economic, political, and global macro factors (for example, a global pandemic such as COVID-19, the large expansion of government deficits and debt, military conflicts, inflation, tariffs, sanctions and recessions). These and other similar events could be prolonged and could adversely affect the value and liquidity of the Fund's investments and negatively impact the Fund's performance.

Economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not the Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic and financial difficulties, the value and liquidity of the Fund's investments may be negatively affected.

Calculation Methodology Risk. The Index relies on a number of sources of information, either directly or indirectly, to assess the criteria of issuers in the eligible universe of constituents. This information may be based on assumptions and estimates. Neither the Fund, the Index Provider, or the Advisor can offer assurances that the Index's calculation methodology or sources of information will provide an accurate assessment of included components or a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

ETF Risks. The Fund is an ETF and, as a result of an ETF's structure, it is exposed to the following risks:

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent that (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers

and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform such functions, shares may trade at a material discount to NAV, the bid-ask spread could widen, and shares could face trading halts and/or delisting.

- *Costs of Buying or Selling Fund Shares.* Due to the costs of buying or selling shares, including brokerage commissions imposed by brokers, frequent trading of shares may significantly reduce investment results and an investment in shares may not be advisable for investors who anticipate regularly making small investments.
- *Fund Shares May Trade at Prices Other Than NAV.* As with all ETFs, shares may be bought and sold in the secondary market at market prices. As a result, investors in the Fund may pay significantly more or receive significantly less for shares than the Fund's NAV. In addition, investors may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling shares in the secondary market (the "bid-ask spread").

Although it is expected that the market price of shares will approximate the Fund's NAV, there may be times when the market price of shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for shares in the secondary market, in which case such premiums or discounts may be significant and the bid-ask spread could widen.

- *Trading.* Although shares are listed for trading on NYSE Arca (the "Exchange") and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. In stressed market conditions, the liquidity of shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than shares. This could lead to the Fund's shares trading at a price that is higher or lower than the Fund's NAV.

New Fund Risk. The Fund is recently organized with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Indexing Investment Risk. The Fund is not actively managed, does not attempt to outperform the Index, and will generally not take defensive positions under any market conditions. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Sector Risk. The Fund's investments may be focused in a particular sector or concentrated in an industry or group of industries to the same extent as the Index. To the extent the Fund invests more heavily in particular industries, groups of industries, or sectors of the economy, its performance will be especially sensitive to developments that significantly affect those industries, group of industries, or sectors. As of December 31, 2025, the Index was significantly focused in the following sector and, therefore, the performance of the Fund could be negatively impacted by events affecting that sector.

- *Information Technology Sector Risk.* Market or economic factors impacting information technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of information technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability.

Tracking Error Risk. The Fund's returns may not match or achieve a high degree of correlation with the returns of the Index. A number of factors may contribute to tracking error such as fund expenses, imperfect correlation between the Fund's investments and those of the Index, rounding of share prices, the timing or magnitude of changes to the composition of the Index, and regulatory policies. For example, the Fund incurs operating expenses not applicable to the Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index.

Performance

The Fund is new, and therefore, does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance. Updated performance information is available on the Fund's website at www.rukfunds.com.

Management

Investment Advisor

Sound Capital Solutions LLC (“Sound Capital” or the “Advisor”) serves as the investment advisor to the Fund.

Portfolio Manager

Dominic Dalmaso, Chief Investment Officer of Sound Capital Solutions, has managed the Fund since the Fund’s inception in April 2026.

Purchase and Sale of Shares

The Fund issues and redeems shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities and a designated amount of U.S. cash.

Shares of the Fund are listed on the Exchange, and individual shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

Investors may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling shares in the secondary market (the “bid-ask spread”). Recent information about the Fund, including its NAV, market price, premiums and discounts, and bid-ask spreads is available on the Fund’s website at www.rukfunds.com.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts. You should consult your tax advisor about your specific tax situation.

Financial Intermediary Compensation

If you purchase shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Advisor or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund seeks to track the total return performance, before fees and expenses, of the Index. The Fund's investment objective is not fundamental and may be changed without shareholder approval.

Additional Information About the Fund's Principal Investment Strategies

The Ruk Strategic Growth Index (the "Index") is a proprietary, rules-based methodology owned by Ruk Indexes LLC (the "Index Provider"). Rebalancing of the Index occurs monthly based on updates to publicly available financial information for the issuers and is completed by VettaFi LLC (the "Calculation Agent"). The Calculation Agent is not affiliated with the Fund, the Advisor, or the Index Provider and shall have no liability for any errors or omissions in calculating the Index. The Index utilized by the Fund is the intellectual property of the Index Provider.

The Fund's policy to invest, under normal circumstances, at least 80% of its net assets (plus any borrowing for investment purposes) in securities comprising the Index and in investments that have economic characteristics similar to the securities comprising the Index is non-fundamental and may be changed without a vote of shareholders upon at least 60 days' prior written notice to shareholders.

As of December 31, 2025, approximately 37.9% of the Index was represented by companies in the information technology sector. As a result, the Fund expects to have a significant level of exposure to the information technology sector.

Additional Information About the Fund's Principal Risks

This section provides additional information regarding the principal risks described in the Summary. Each risk described below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Each of the factors below could have a negative impact on the Fund's performance and trading prices.

Equity Securities Risk. The risks that could affect the value of shares and the total return on your investment include the possibility that the equity securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. Securities fluctuate in price based on changes in a company's financial condition and overall market and economic conditions. The value of a particular security may decline due to factors that affect a particular industry or industries, such as an increase in production costs, competitive conditions or labor shortages; or due to general market conditions, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or generally adverse investor sentiment. If the market prices of the securities owned by the Fund fall, the value of your investment in the Fund will decline.

Market Risk. Market risks, including political, regulatory, market, and economic or other developments, and developments that impact specific economic sectors, industries or segments of the market, can affect the value of the Fund's shares. Local, regional, or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the market generally and on specific securities. The Fund is subject to the risk that the prices of, and the income generated by, securities held by the Fund may decline significantly and/or rapidly in response to adverse issuer, political, regulatory, general economic and market conditions, or other developments, such as regional or global economic instability (including terrorism and related geopolitical risks), interest rate fluctuations, and those events directly involving the issuers that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment. Such events may cause the value of securities owned by the Fund to go up or down, sometimes rapidly or unpredictably. Changes in the economic climate, investor perceptions and stock market volatility also can cause the prices of the Fund's investments to decline regardless of the conditions of the issuers held by the Fund. There is also a risk that policy changes by the U.S. government and/or Federal Reserve (for example, relating to interest rates or trade) could cause increased volatility in financial markets, which could have a negative impact on the Fund.

Prices may fluctuate widely over short or extended periods in response to company, market or economic news. Markets also tend to move in cycles, with periods of rising and falling prices. If there is a general decline in the securities and other markets, your investment in the Fund may lose value, regardless of the individual results of the securities and other instruments in which the Fund invests.

Policy and legislative changes in the United States and in other countries are affecting many aspects of financial regulation, and may in some instances contribute to decreased liquidity and increased volatility in the financial markets. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known at the time of adoption.

Economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not the Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic and financial difficulties, the value and liquidity of the Fund's investments may be negatively affected.

Periods of market volatility may occur in response to market events and other economic, political, and global macro factors. These events (e.g., global pandemic, military conflicts, inflation, political or regulatory changes, and/or recessions) can cause significant disruptions to business operations, including business closures; strained healthcare systems; disruptions to supply chains and employee availability; large fluctuations in consumer demand; large expansion of government deficits and debt as a result of government actions to mitigate the effects of such events; and widespread uncertainty regarding the long-term effects of such events. Such events could be prolonged and could adversely affect the value and liquidity of the Fund's investments and negatively impact the Fund's performance.

Calculation Methodology Risk. The Index relies on a number of sources of information, either directly or indirectly, to assess the criteria of issuers in the eligible universe of constituents. This information may be based on assumptions and estimates. Neither the Fund, the Index Provider, or the Advisor can offer assurances that the Index's calculation methodology or sources of information will provide an accurate assessment of included components or a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

ETF Risks. The Fund is an ETF and, as a result of an ETF's structure, it is exposed to the following risks:

- *APs, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent that (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform such functions, shares may trade at a material discount to NAV, the bid-ask spread could widen, and shares could face trading halts and/or delisting.
- *Costs of Buying or Selling Shares.* Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Fund shares. In addition, secondary market investors will also incur the cost of the difference between the price at which an investor is willing to buy Fund shares (the "bid" price) and the price at which an investor is willing to sell Fund shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Fund shares based on trading volume and market liquidity, and is generally lower if Fund shares have more trading volume and market liquidity and higher if Fund shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Fund shares, including bid/ask spreads, frequent trading of Fund shares may significantly reduce investment results and an investment in Fund shares may not be advisable for investors who anticipate regularly making small investments.
- *Fund Shares May Trade at Prices Other Than NAV.* As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Fund shares will approximate the Fund's NAV, there may be times when the market price of Fund shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of shares or during periods of market volatility. If an investor buys Fund shares when the shares' market price is at a premium, the investor may pay more than the shares' underlying value. If an investor sells Fund shares when the shares' market price is at a discount, the investor may receive less than the shares' underlying value. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Fund shares in the secondary market, in which case such premiums or discounts may be significant.
- *Trading.* Although Fund shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Fund shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Fund shares inadvisable. In addition, trading in Fund shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange when a decline in the S&P 500[®] Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Fund shares when extraordinary volatility causes sudden, significant swings in the market price of Fund shares. There can be no assurance that Fund shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Fund shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Fund shares and could lead to differences between the market price of the Fund's shares and the underlying value of those shares.

New Fund Risk. The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Indexing Investment Risk. The Fund is not actively managed and may be impacted by a general market decline in market segments related to the Index. The Fund will invest in securities that are included in the Index and the portfolio manager will not generally attempt to invest the Fund's assets in defensive positions under any market conditions, including during declining markets.

Sector Risk. The Fund's investments may be focused in a particular sector or concentrated in an industry or group of industries to the same extent as the Index. To the extent the Fund invests more heavily in particular industries, groups of industries, or sectors of the economy, its performance will be especially sensitive to developments that significantly affect those industries, group of industries, or sectors. As of December 31, 2025, the Index was significantly focused in the following sector and, therefore, the performance of the Fund could be negatively impacted by events affecting that sector.

- *Information Technology Sector Risk.* Market or economic factors impacting information technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of information technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability. Additionally, companies in the technology sector may face dramatic and often unpredictable changes in growth rates and competition for the services of qualified personnel.

Tracking Error Risk. The Fund's returns may not match or achieve a high degree of correlation with the returns of the Index. A number of factors may contribute to tracking error such as fund expenses, imperfect correlation between the Fund's investments and those of the Index, rounding of share prices, the timing or magnitude of changes to the composition of the Index, and regulatory policies. For example, the Fund incurs operating expenses not applicable to the Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund's daily portfolio holdings is available at www.rukfunds.com. A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

MANAGEMENT

Investment Advisor

Sound Capital Solutions LLC serves as the Fund's investment advisor and is located at 29141 Brendisi Way, Unit 201, Naples, Florida 34110.

The Advisor has overall supervisory responsibility for the general management and investment of the Fund, subject to the oversight of the Board. The Advisor also furnishes the Fund with office space and certain administrative services and provides most of the personnel needed to fulfill its obligations under its Investment Advisory Agreement (the "Advisory Agreement"). Under the Advisory Agreement, the Advisor has agreed to pay substantially all expenses of the Fund, except for the fee paid to the Advisor pursuant to the Advisory Agreement, interest charges on any borrowings, dividends, and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, expenses associated with the purchase, sale, or ownership of securities, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution (12b-1) fees and expenses.

For its services the Advisor receives a single unitary management fee from the Fund at an annual rate of 0.50% of the average daily net assets of the Fund. A discussion regarding the basis for the Board's approval of the Advisory Agreement for the Fund will be available in the Fund's first report filed on Form N-CSR.

Portfolio Manager

Dominic Dalmaso serves as the portfolio manager and is primarily responsible for the day-to-day management of the Fund and has acted in this capacity for the Fund since its inception in April 2026.

Dominic Dalmaso, Chief Investment Officer of Sound Capital Solutions, joined the Advisor in 2021. From 2018 to 2021, Mr. Dalmaso acted as an internal advisor consultant at Nuveen Investments assisting in asset allocation and portfolio analysis for

private wealth advisory practices. Mr. Dalmaso earned a B.S. in Finance from Indiana University and is a CFA and CAIA Charterholder.

The Fund's SAI provides additional information about the portfolio manager's compensation structure, other accounts managed by the portfolio manager, and the portfolio manager's ownership of shares of the Fund.

BUYING AND SELLING FUND SHARES

Fund shares are listed for secondary trading on the Exchange. When you buy or sell the Fund's shares on the secondary market, you will pay or receive the market price. You may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The shares will trade on the Exchange at prices that may differ to varying degrees from the daily NAV of the shares.

The Fund issues and redeems shares at NAV only in Creation Units. Only APs may acquire shares directly from the Fund, and only APs may tender their shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a participant agreement that has been agreed to by the Fund's distributor, and that has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, shares trade in the secondary market in quantities less than a Creation Unit.

The Fund's NAV per share is calculated as of the close of regular trading (generally 4:00 pm Eastern Time) on each day that the New York Stock Exchange ("NYSE") is open for business. The NYSE is generally open Monday through Friday and is closed weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Purchase and redemption requests are priced based on the next NAV per share calculated after receipt of such request. The NAV is the value of the Fund's securities, cash and other assets, minus all expenses and liabilities (assets – liabilities = NAV). NAV per share is determined by dividing NAV by the number of shares outstanding (NAV/# of shares = NAV per share). The NAV takes into account the expenses and fees of the Fund, including management and administration fees, which are accrued daily.

In calculating the NAV, portfolio securities are valued using current market values or official closing prices, if available. Each security owned by the Fund that is listed on a securities exchange is valued at its last sale price on that exchange on the date as of which assets are valued. When the security is listed on more than one exchange, the Fund will use the price of the exchange that the Fund generally considers to be the principal exchange on which the security is traded.

When reliable market quotations are not readily available or the Fund's pricing service does not provide a valuation (or provides a valuation that in the judgment of the Advisor does not represent the security's fair value) or when, in the judgment of the Advisor, events have rendered the market value unreliable, a security or other asset will be valued at its fair value in good faith in accordance with the Advisor's pricing procedures, subject to oversight by the Board. Valuing securities at fair value is intended to ensure that the Fund is accurately priced and involves reliance on judgment. The Advisor will regularly evaluate whether the Fund's fair valuation pricing procedures continue to be appropriate in light of the specific circumstances of the Fund and the quality of prices obtained through the application of such procedures. There can be no assurance that the Fund will obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Fund determines its NAV per share.

Other types of investments that the Fund may hold for which fair value pricing might be required include, but are not limited to: (a) investments which are not frequently traded and/or the market price of which the Advisor believes may be stale; (b) illiquid securities, including "restricted" securities and private placements for which there is no public market; (c) securities of an issuer that has entered into a restructuring; (d) securities whose trading has been halted or suspended; and (e) fixed income securities that have gone into default and for which there is not a current market value quotation.

Frequent Purchases and Redemptions of Fund Shares

Unlike frequent trading of shares of a traditional open-end mutual fund's (i.e., not exchange-traded) shares, frequent trading of shares of the Fund on the secondary market does not disrupt portfolio management, increase the Fund's trading costs, lead to realization of capitalization gains, or otherwise harm the Fund's shareholders because these trades do not involve the Fund directly. Certain institutional investors are authorized to purchase and redeem the Fund's shares directly with the Fund. Because these trades are effected in-kind (i.e., for securities, and not for cash), they do not cause any of the harmful effects noted above that may result from frequent cash trades. Moreover, the Fund imposes transaction fees on in-kind purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting in-kind trades. These fees increase if an investor substitutes cash in part or in whole for Creation Units, reflecting the fact that the Fund's trading costs increase in those circumstances. For these reasons, the Board has determined that it is not necessary to adopt policies and procedures to detect and deter frequent trading and market-timing in shares of the Fund.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Fund Distributions

The Fund intends to pay out dividends, if any, and distribute any net realized capital gains to its shareholders annually.

Dividend Reinvestment Service

Brokers may make available to their customers who own the Fund's shares the Depository Trust Company ("DTC") book-entry dividend reinvestment service. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of the Fund. Without this service, investors would receive their distributions in cash. In order to achieve the maximum total return on their investments, investors are encouraged to use the dividend reinvestment service. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require the Fund's shareholders to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

Tax Information

Below the Fund has summarized certain important U.S. federal income tax considerations generally applicable to investments in the Fund. The summary is based on current tax law, which may be changed by legislative, judicial or administrative action. Please consult your tax advisor about the tax consequences of an investment in Fund shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to elect and intends to qualify each year for treatment as a regulated investment company ("RIC") within the meaning of Subchapter M of the Internal Revenue Code of 1986, as amended. If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, the Fund's failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and consequently a reduction in income available for distribution to shareholders.

Unless you are a tax-exempt entity or your investment in Fund shares is made through tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when the Fund makes distributions, you sell Fund shares, and you purchase or redeem Creation Units (APs only).

Taxes on Distributions

The Fund intends to pay out dividends, if any, quarterly and distribute any net realized capital gains to its shareholders annually. Dividends of net investment income and distributions from the Fund's net short-term capital gains are taxable to you as ordinary income or, in some cases, as qualified dividend income. Distributions from the Fund's net capital gain (the excess of its net long-term capital gains over its net short-term capital losses) are generally taxable to non-corporate shareholders at rates of up to 20%, regardless of how long the shareholders held their respective shares in the Fund. You will be taxed in the same manner whether you receive your dividends and capital gain distributions in cash or reinvest them in additional Fund shares.

Distributions that the Fund reports as "qualified dividend income" may be eligible to be taxed to non-corporate shareholders at rates of up to 20% if requirements, including holding period requirements, are satisfied. In general, the Fund may report its dividends as qualified dividend income to the extent derived from dividends paid to the Fund by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. A portion of the dividends received from the Fund (but none of its capital gain distributions) may qualify for the dividends received deduction for corporations.

A tax of 3.8% applies to all or a portion of net investment income of U.S. individuals with income exceeding specified thresholds, and to all or a portion of undistributed net investment income of certain estates and trusts. Net investment income generally includes for this purpose dividends and capital gain distributions paid by the Fund and gain on the redemption of Fund shares.

Any dividend or capital gain distribution paid by the Fund has the effect of reducing the NAV per share on the ex-dividend date by the amount of the dividend or capital gain distribution. You should note that a dividend or capital gain distribution paid on shares purchased shortly before that dividend or capital gain distribution was declared will be subject to income taxes even though the dividend or capital gain distribution represents, in substance, a partial return of capital to you. This is known as "buying a dividend" and should generally be avoided by taxable investors.

Although distributions are generally taxable when received, certain distributions declared in October, November, or December to shareholders of record on a specified date in such a month but paid the following January are taxable as if received in December of the year in which the dividend is declared.

Shortly after the close of each calendar year, you will be informed of the amount and character of any distributions received from the Fund.

Taxes on Sale of Fund Shares

Each sale of shares of the Fund may be a taxable event. Assuming you hold your shares as a capital asset, a sale generally results in a capital gain or loss to you. Any capital gain or loss generally will be treated as short-term if you held the shares 12 months or less, except that any capital loss on a sale of shares held for six months or less is treated as a long-term capital loss to the extent of capital gain distributions paid with respect to such shares. Any capital gain or loss generally will be treated as long-term if you held the shares for longer than 12 months. If you redeem your Fund shares, it is considered a taxable event for you. Depending on the purchase price and the redemption price of the shares you redeem, you may have a gain or a loss on the transaction. You are responsible for any tax liabilities generated by your transaction. All or a portion of any loss realized upon a taxable disposition of Fund shares will be disallowed if you purchase other substantially identical shares within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss. The ability to deduct capital losses may be limited depending on your circumstances.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP's aggregate basis in the securities delivered, plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP's basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The IRS may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for an AP who does not mark-to-market its holdings) or on the basis that there has been no significant change in economic position. Persons exchanging securities or non-U.S. currency for Creation Units should consult their own tax advisor with respect to the tax treatment of any creation or redemption transaction and whether the wash sale rules apply and when a loss might be deductible.

Gain or loss recognized by an AP upon an issuance of Creation Units in exchange for securities, or upon a redemption of Creation Units, may be capital or ordinary gain or loss depending on the circumstances. Any capital gain or loss realized upon an issuance of Creation Units in exchange for securities will generally be treated as long-term capital gain or loss if the securities have been held for more than one year. Any capital gain or loss realized upon the redemption of a Creation Unit will generally be treated as long-term capital gain or loss if the Fund shares comprising the Creation Unit have been held for more than one year. Otherwise, such capital gains or losses are treated as short-term capital gains or losses.

The Fund may include cash when paying the redemption price for Creation Units in addition to, or in place of, the delivery of a basket of securities. The Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

Non-U.S. Investors

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than capital gain distributions) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Under legislation generally known as "FATCA" (the Foreign Account Tax Compliance Act), the Fund is required to withhold 30% of certain ordinary dividends it pays to shareholders that are foreign entities and that fail to meet prescribed information reporting or certification requirements.

Backup Withholding

The Fund (or financial intermediaries, such as brokers, through which shareholders own shares of the Fund) generally is required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any

shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that such shareholder is not subject to such withholding.

Additional information concerning taxation of the Fund and its shareholders is contained in the SAI. Tax consequences are not the primary consideration of the Fund in making its investment decisions. If you have a tax-advantaged retirement account, you will generally not be subject to federal taxation on any dividends and capital gain distributions until you begin receiving your distributions from your retirement account. *You should consult your own tax adviser concerning federal, state and local tax considerations of an investment in the Fund.*

DISTRIBUTION OF FUND SHARES

Quasar Distributors, LLC, a wholly-owned broker-dealer subsidiary of Foreside Financial Group, LLC, is located at 190 Middle Street, Suite 301, Portland, Maine 04101, and is the distributor for the shares of the Fund. Quasar is a registered broker-dealer and a member of the Financial Industry Regulatory Authority. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Fund shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund.

The Board has adopted a Distribution and Service Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. The implementation of any such payments would have to be approved by the Board prior to implementation. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of the Fund's assets, these fees will increase the cost of your investment and may cost you more over time than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

Information regarding how often Shares traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV per Share is available, free of charge, on the Fund's website at www.rukfunds.com.

ADDITIONAL NOTICES

Shares of the Fund are not sponsored, endorsed, or promoted by the Exchange. The Exchange makes no representation or warranty, express or implied, to the owners of the shares of the Fund. The Exchange is not responsible for, nor has it participated in, the determination of the timing of, prices of, or quantities of the shares of the Fund to be issued, or in the determination or calculation of the equation by which the shares are redeemable.

The Exchange has no obligation or liability to owners of the shares of the Fund in connection with the administration, marketing, or trading of the shares of the Fund. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Advisor and the Fund make no representation or warranty, express or implied, to the owners of shares of the Fund or any members of the public regarding the advisability of investing in securities generally or in the Fund particularly.

FINANCIAL HIGHLIGHTS

Financial information is not available because the Fund had not commenced operations prior to the date of the Prospectus.

Statement of Additional Information (“SAI”)

The SAI provides additional details about the investments and techniques of the Fund and certain other additional information. A current SAI is on file with the SEC and is incorporated into this Prospectus by reference. This means that the SAI is legally considered a part of this Prospectus even though it is not physically within this Prospectus.

Annual and Semi-Annual Reports and Form N-CSR

Additional information about the Fund’s investments will be available in the Fund’s annual and semi-annual reports to shareholders and in Form N-CSR. In the annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund’s performance during its last fiscal year. In Form N-CSR, you will find the Fund’s annual and semi-annual financial statements.

The SAI, annual and semi-annual shareholder reports, and other information such as the Fund’s financial statements are available free of charge on the Fund’s website at www.rukfunds.com. You can obtain a free copy of the SAI shareholder reports, and financial statements, and request other information, or make general inquiries about the Fund by calling (toll free) at 1-800-617-0004.
